Co-Director: Douglas D. Reh, MD  
Email: [dreh1@jhmi.edu](mailto:dreh1@jhmi.edu)

**Overview:**

The Johns Hopkins rhinology fellowship is a 1 year program designed to provide a comprehensive training experience to prepare participants for a career in academic rhinology. Fellows will participate in a busy tertiary rhinology practice that is supported by a strong institutional network of regional, national, and international referrals. Johns Hopkins Sinus Center clinical activities include the breadth of medical rhinology, including otolaryngic allergy and office-based procedures. Fellows will receive operative training in primary and revision endoscopic sinus surgery, advanced frontal sinus procedures, endoscopic approaches to orbital disease processes, removal of benign and malignant tumors, and endoscopic skull base surgery. In addition, fellows will assume graduated responsibility for an independent clinic and surgical caseload. It is expected that fellows will participate in resident teaching and attend rhinology case conferences, as well as make educational presentations within the department.

The Johns Hopkins Sinus Center is a national leader in NIH-funded research in rhinology. Fellows will have an opportunity to take part in a robust clinical and basic science research experience through their work with the fellowship directors. Dr. Lane's laboratory focuses on clinically-oriented bench research into the underlying mechanisms of chronic rhinosinusitis and inflammatory olfactory loss. The fellowship offers mentorship for obtaining foundation and/or NIH grant support that can provide a springboard toward a career as a clinician-

scientist. Clinical research is also being conducted in partnership with industry, and fellows have the opportunity to lead these projects and further develop new corporate relationships.

**Eligibility:**

Applicants must be board eligible/board certified and satisfy the requirements for Maryland medical licensure.

**Salary and Benefits:**

Fellows are paid at University PGY-6 level (\$54,706 for FY 2007-08) in addition to full University health benefits.

**Application Process:**

The application process is managed through the SF match. All applications should be submitted online through [www.sfmach.org](http://www.sfmach.org). Please feel free to contact the fellowship program directors with questions.
